Attune™ NxT – Daily Maintenance

Beginning of the Day

1 POWER ON your system

Notes: if the system is already ON, relaunch the software

**2** Run Startup

**3** Run Performance Test

4 Sanitize Attune SIP

Between Experiments or Plates

**1** Sanitize SIP with Bleach

2 Sanitize SIP with Wash

After sticky cells, prefer Deep Clean

End of the Day

1 Sanitize SIP with Flow Cell Cleaning solution
(only once a week if <6 hours of use)

2 Run Shutdown

3 POWER CYCLE the entire system at least once a week
