

Lactobacillus delbrueckii subsp. lactis

[General information](#) | [Occupational and health protection](#) | [Links](#) | [References](#)

GENERAL INFORMATION

Lactobacillus delbrueckii subsp. lactis

Lactobacillus lactis
Lactobacillus leichmannii

For further information on the current nomenclature of the species see
[List of Prokaryotic Names with Standing in Nomenclature](#)

Document Number:	823252
Category:	Bacteria
Risk group:	1 Biological agents that are unlikely to cause human disease.

OCCUPATIONAL SAFETY AND HEALTH

[Protective measures](#) | [Inactivation/Decontamination](#) | [Occupational health care](#)

PROTECTIVE MEASURES

The following protective measures apply to specific activities in laboratories, the husbandry of laboratory animals and biotechnological activities. For further information see [TRBA 100](#), [TRBA 120](#), [TRBA 500](#).

Technical measures

Where tasks intentionally involve biomaterials, their identity must be verified and documented routinely.

For biological agents of the risk group 1 the basic rules of good microbiological practice are to be followed in the intended laboratory operations. For biomaterials exhibiting sensitising or toxic properties, the risk assessment may indicate that additional precautions are necessary.

The doors of the protection level area must be equipped with an inspection window.

Wash basins, disposable towels and hand detergents must be available.

Surfaces (worktops, floors) must be easy to clean and resistant to the materials and detergents used.

Work areas are to be maintained in a clean and tidy state. Only tools and devices that are actually needed may remain on the benches.

Pipettors must be provided and used. Mouth pipetting is not permitted.

If the use of pointed or sharp instruments cannot be avoided, they must be disposed of in suitable containers after use.

Suitable containers must be available for the collection of waste that constitutes biological agents.

Organisational measures

Injuries must be reported immediately to the person in charge.

Personal protection - body protection

Lab coats are mandatory.

Used lab coats must be kept separate from normal clothing.

Personal protection - hand protection

Use protective gloves as required.

The skin protection plan must be observed.

Occupational hygiene

The consumption and storage of food and alcohol/tobacco in the protection level area is forbidden. The hands are to be thoroughly cleaned and treated according to the hand protection plan following completion of the activities or contamination processes.

Reference: 00001 99999

INACTIVATION / DECONTAMINATION

All solid and liquid wastes can be disposed of without pre-treatment if not otherwise stipulated by legal regulations (such as water, waste or genetic engineering legislation).

Reference: 00001

OCCUPATIONAL HEALTH CARE according to [ArbMedVV](#)

In the case of activities with the biological agent no health care is required. An indication on restrictions for immunosuppressed workers should be made.
